Residential Water Treatment Solutions

Purifiers >

UV Water Purifier

Uses ultraviolet technology to eliminate bacteria and viruses, providing safe, germ-free drinking water.

RO Water Purifier

Employs reverse osmosis to remove contaminants, heavy metals, and impurities, delivering pure, great-tasting water.

Whole house filtration >

Dual Media Filter

Combines sand and anthracite layers to effectively filter out sediment and suspended particles from the entire water supply.

Iron Removal System

Targets iron and manganese in water, preventing staining and maintaining water clarity for household use.

Water Softener

Reduces hardness in water by removing calcium and magnesium, helping to prevent scale buildup in pipes and appliances.

Activated Carbon Filter

Absorbs chlorine, odors, and organic compounds, enhancing taste and reducing chemical pollutants in water.

Trusted. Efficient. Premium. Qdrop delivers water treatment solutions that are meticulously crafted and fully supported every step of the way

Introducing All in one

SMART PURIFICATION THROUGH
